BRAINWORX - bx_greenscreamer
FET Overdrive Stomp Pedal
Classic Tones - from Stevie Ray Vaughn to Metallica

Thank you for using the BRAINWORX bx_greenscreamer plugin.

The Brainworx bx_greenscreamer Overdrive is an exacting plugin emulation of the classic Ibanez TS808 Tube Screamer®, one of the most popular overdrive pedals ever made. Insert it in any effects chain to hear its distinctive, thick, vocal-like mid-range tone.

The Brainworx bx_greenscreamer is a component level emulation of this classic pedal, capturing all the warm drive and tone and putting it right inside your DAW.

In addition, the plugin version allows you to do some things you could never do with a pedal, like automate all parameters, process a stereo buss or run multiple instances.

Legal Disclaimer: *Ibanez™ TS808® and Tube Screamer® are registered trademarks of Ibanez Guitars, Inc. bx_greenscreamer was developed by Brainworx Music and Media GmbH based on its own modeling techniques. Ibanez Guitars has not endorsed nor sponsored the bx_greenscreamer in any manner, nor licensed any intellectual property for use in this product.*

BRAINWORX - bx_greenscreamer
FET Overdrive Stomp Pedal
Classic Tones - from Stevie Ray Vaughn to Metallica

(1) OVERDRIVE

This knob adjusts the amount of distortion added by bx_greenscreamer.

(2) LEVEL

This knob controls the output level of the tone produced by bx_greenscreamer. Use it as an output trim for matching pre/post processing sounds or preventing clipping in the digital domain.

(3) TONE

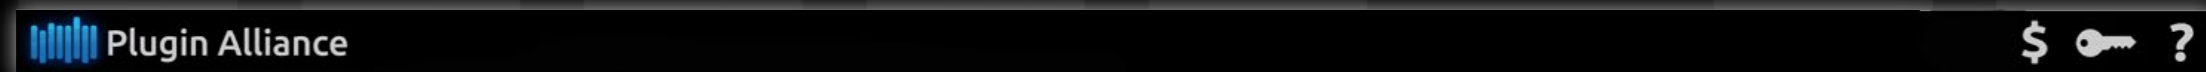

This knob controls the contour of the high frequency values; clockwise motion will add presence and edge to the tone, counter-clockwise motion will produce warmer, mellow tones.

(4) Stomp Switch

Pedal-style on/off button, for that guitar rig feel.
